

# TMAS PC Manager

Central Management Software for

TMN-50T

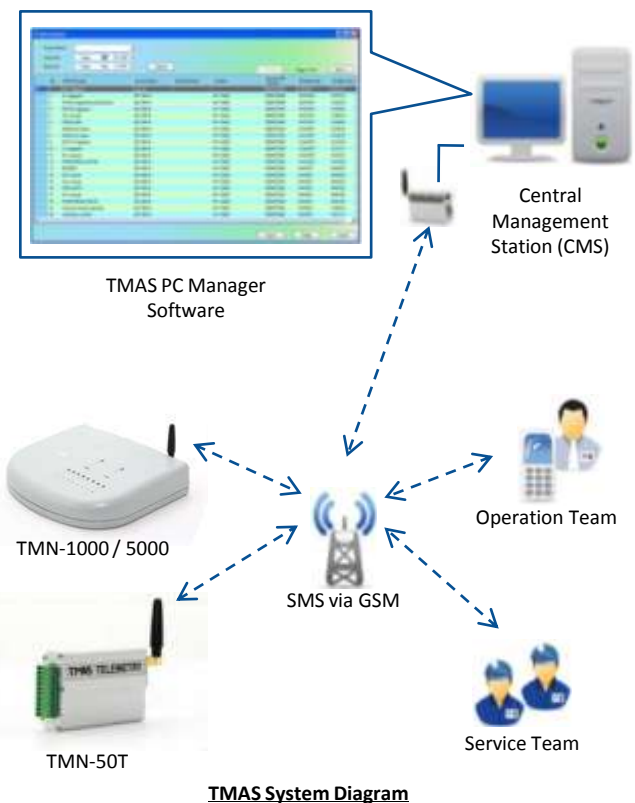

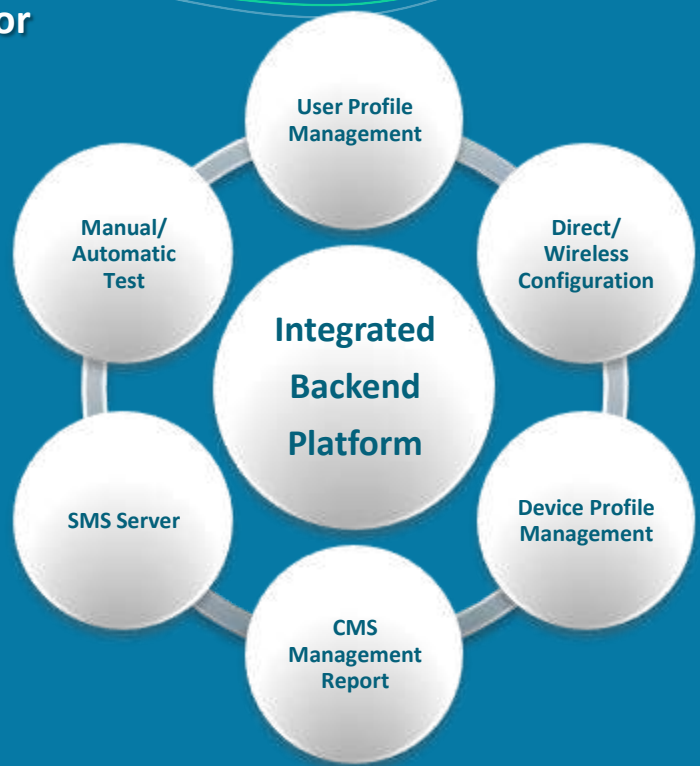

TMN-1000

TMN-5000

TMN-5000-SDL

## What is a TMAS PC Manager ?

The TMAS PC Manager is a fully integrated PC based management software, to allow direct or wireless configuration of TMAS Telemetry devices and to enabling a complete wireless central management station (CMS) to manage the field telemetry devices in an efficient and user friendly way. Application service providers can make full use of the software to easily setup a full CMS station on their own without heavy investment. The software can be very scalable, to manage a single remote device up to thousand over deployment .

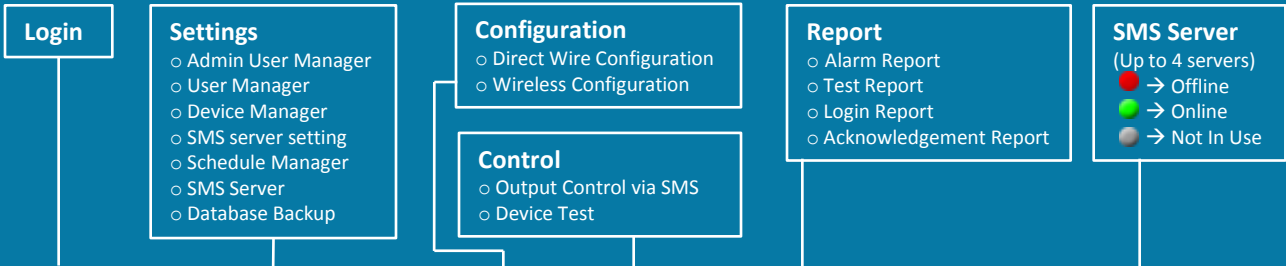

## Features

- Remote Monitoring
- Remote Control
- Remote Wireless Configuration Update
- Remote Health Check
- Report Generation
  - Alarm Report
  - Test Report
  - Login Report
  - User ACK Report

## Functions

- Auto lockout every 30 minutes
- Master admin Login with full access
- Project Officer Login with access to control & report function only
- Support up to 4 SMS servers with ability to monitor connection status and alarm alert individually
- Auto Start & Auto Recovery capability for all SMS servers
- Automated backup of reports at every 1-12 months selectable
